

ReactJS Challenges

By Lux Tech Academy

1). My Profile Component challenge:

a). Set up a simple react project using CRA. You can give it any Name of your choice.

b). Create a functional component call MyProfile that returns:

- An h1 with the text “Welcome to my profile page”
- A p with blurb about your self around 30 words.
- An unordered list with any 3 programming languages.

c). Render an instance of the functional component to the browser.

Additional: Research and learn on your own how to add styles to your page.

2). Multiple components in react.

a). Set up a react app using CRA.

b). Render an App component.

c). Inside App component, render:

- i). Portfolio component (functionn component)
- ii). Blog component (function component)
- iii). Contact component (class based component)

Your 3 component should be is a folder named component folder.

Note: You can learn on your own how to deploy your react apps on netlify but we will cover it in a new future.

The Task is optional for only those who would wish to specialize with react as there front end framework. **Use VCS and submit a link to luxtinc@gmail.com**
